

KSD Outreach

ABOUT US

KSD Outreach is the division of Kentucky School for the Deaf that provides supports to students in mainstream settings across Kentucky. KSD Outreach places Educational Consultants across the commonwealth to provide technical assistance for special education cooperatives, districts, and families of student with a hearing loss. Technical assistance is available for evaluations, educational programming, classroom adaptations, interpreting, communication, hearing technology supports and meaningful inclusionary practices. Support services are provided from birth to graduation. Our services are provided through the Kentucky Department of Education at no cost to districts.

VISION STATEMENT

KSD Outreach will utilize a whole child approach to provide support, education, and services to children, families, district personnel, and community members to promote confident, competent, and emotionally healthy individuals.
